SUMMARY

Informatics Engineering graduate with hands-on experience in web application development and operational digitalization through a government internship at Badan Pusat Statistik (BPS) Kota Pariaman. Contributed to the development of internal web-based systems and workflow applications focused on inventory management, employee activity monitoring, meeting management, guest services, and administrative processes using Laravel, MySQL, Tailwind CSS, Alpine.js, and Leaflet.

Also involved in field data collection, validation activities, and statistical publication support within operational government workflows. Currently strengthening frontend and backend fundamentals, problem-solving skills, and system understanding, with a strong interest in fullstack web development.

EDUCATION

Malikussaleh University 🌐

Informatics Engineering

GPA 3,73

09/2020 – 12/2024 | Lhokseumawe, Aceh

EXPERIENCE

Freelance

04/2023 – Present

Data Entry Specialist

Assisted journalists in entering, managing, and verifying monthly news clippings into the government website system with precision and data reliability.

- Ensured minimum monthly quota of 25 published news articles per journalist met and submitted on time.
- Collaborated remotely with field journalists to streamline digital submission and reduce administrative workload.

BPS Kota Pariaman via Maganghub Kemnaker

12/2025 – 06/2026 | Kota Pariaman

Asisten Pengelola BMN - Internship

- Developed an internal web-based superapp integrating multiple operational modules, including inventory, activity tracking, meeting management, and partner systems
- Implemented Single Sign-On (SSO) integration with a centralized authentication system for internal staff access and role-based workflows
- Built and maintained web applications using Laravel, MySQL, Tailwind CSS, and Alpine.js with a modular layered architecture approach
- Developed an integrated guest management system synchronized with Google Forms and Google Sheets API, including queue management, employee assignment workflows, and automated reporting features
- Contributed to a village business mapping system (Desa Cantik) using Leaflet for geospatial visualization features
- Participated in post-disaster data collection and conducted ground verification (SBR) to support statistical data accuracy and validation
- Assisted in the preparation of official statistical publications, including Pariaman Dalam Angka 2025
- Supported outreach and socialization activities for Sensus Ekonomi 2026
